No Child Hungry

RECOMMENDATION LETTER

Data and Analytics Department and Data Application
No Child Hungry, Inc.
Prepared by
William Lowry, President, No Child Hungry

To Whom It May Concern,

It is my distinct pleasure to write this letter of recommendation for Nathan Edery, who served as a Data Science Intern at No Child Hungry during the Summer of 2024. Reporting directly to me, Nathan played a pivotal role in our efforts to eradicate childhood hunger through advanced analytics and process optimization.

During his tenure, Nathan demonstrated exceptional technical proficiency and a keen ability to apply data science to real-world operational challenges. He was tasked with compiling and analyzing complex datasets across several critical areas of our organization. Most notably, Nathan led initiatives to optimize our supply chain processes for meal packaging events. By analyzing internal and external sourcing data for critical ingredients, he helped us establish protocols that maximized efficiency and reduced inefficiencies in our product sourcing.

Furthermore, Nathan's contributions to our financial analysis were significant. He meticulously analyzed event implementation costs, including travel, staffing, and logistics, to help develop standard best practices aimed at reducing spend and maximizing event efficiencies. He also demonstrated strong versatility by integrating diverse datasets from our digital touchpoints (website and social media) to map customer journeys and enhance our engagement tactics.

Beyond his technical skills in data analysis, Nathan exhibited the critical thinking and adaptability required in a fast-paced non-profit environment. He approached every task with professionalism and a strategic mindset, consistently delivering actionable insights that furthered our mission.

I am confident that Nathan's expertise in data science, combined with his dedication and work ethic, will make him a valuable asset to any organization. I recommend him without reservation.

Sincerely,

William Lowry
